Tips On Storing your car

That sad time of year is upon us when most of our hot rods are put to rest for the long winter months. Here are a few tips for storing your car this season. Disconnect the battery and bring it into a warm place or have a trickle charger on throughout the winter. Fill the fuel tank to full so condensation does not build up, along with fuel stabilizer. If you are storing your car on bare concrete a blue tarp laid on the floor will prevent water from coming through the floor causing pitting on a lot of alum / Metal parts. Foam or small pieces of carpet under the tires will help prevent the belts inside the tires from deforming. Any further questions feel free to give us a call.

Heated Winter Storage Available

We here at DaSilva Racing offer winter storage here at the shop for \$220 a Month. We also offer storage at Joe's personal Race shop for \$240 a month. Minimum of 5 months required. For info or to make arrangements for storage please contact Joe Da Silva 905 837-7700
